GO-650STUDIO

Complete Studio on the Go

GO-650STUDIO

Imagine if all your video production equipment fit inside one portable case. It would make transporting your equipment from one job to the next a lot easier. **GO-650 STUDIO** is an all in one kit that comes with a SE-650 video switcher, TLM-102 dual monitor for preview and program, NVS-25 streaming encoder, and HDR-1 H.264 USB recorder all racked, connected, and packed in a rugged hard case. What more do you need other than some cameras, which is where the **2 Camera GoKit** comes in. Pair these two GoKits together and you can have a completed video production workflow. Because of the portability of these GoKits, they are ideal for various applications such as worship, live events, seminars, school sporting events, and corporate presentations.

APPLICATIONS

Worship

Many small worship productions need portability because some share the building with another organization, so the need for their video equipment to be easy to pack and transport is required. GO-650 STUDIO Kit is the perfect solution for this application because of its compact design and portability.

Live Events

Easily roll in to your production location with the GO-650 STUDIO Kit. All you need to do is pull out the entire rack with all the equipment connected from the case and you'll be ready to go within seconds. Once the event is over, you can pack it up just as easily as you set it up.
